

How to Make an Origami Diamond Book

Fold along the dotted lines

Materials: 5"x5" tag board, cardboard, or file folder, 3 sheets of 8 ½"x 8 ½" construction paper, glue, crayons, pencils & colored pencils.

Step 1: Fold a square of paper in half horizontally and vertically and unfold to create 4 squares.

Step 2: Flip paper upside down so our paper will be folded toward the opposite direction.

Step 3: Fold paper in half diagonally taking the upper left corner to meet lower right corner to make a triangle. Unfold.

Step 4: Refold on lines tucking lower left corner to meet lower right and upper right corner to meet lower right to create a square.

Repeat steps on 2 more pieces of paper.

Step 5: Glue pages together overlapping on unfolded square. Glue tagboard onto outside of first and last diamond. Refold to make book.

Step 6: Add a story or illustrations. Display like a screen standing up.
